AIN Plastics
22355 West Eleven Mile Road
Southfield MI 48034

AIN Plastics,

You have asked about the RoHS compliance of our Camie aerosol adhesives. None of the 6 substances listed in the regulation are intentionally added as ingredients of our products. The propellants and solvents in the products are highly volatile chemicals with near zero solid matter. The active ingredients are polymers and resins with no intentional addition of the substances on the list. We have looked at the MSDS for each raw material and they do not list any of these substances, even in the Proposition 65 section where they usually would list them down to 1 ppm.

We certify that, to the extent of our knowledge, Camie aerosol adhesives are compliant with the ban on Lead, Mercury, Cadmium, Chromium VI, PBB and PBDE at the levels specified.

Should you have additional questions, please feel free to contact me at the number above.

Sincerely,

Jim McLarty
Manager of Regulatory Affairs
